7:00 - 9:00 PM EST**

CLINICAL PSYCHOLOGY PH.D. PROGRAM

ABOUT US

The Ph.D. in Clinical Psychology follows a scientist-practitioner model featuring personalized guidance from faculty mentors in conducting high-quality original research projects. The program's emphasis on integrated healthcare and health psychology prepares students for research and practice in health care settings. Distinguishing features of the program include a) strong foundational training in clinical psychology, b) advanced training and clinical experience in integrated healthcare and health psychology, c) a strong commitment to the science of clinical psychology and the development of skills and experiences as a clinical scientist, and d) a commitment to diversity across research training.
