

Red Sea Summer Program

The King Abdullah University of Science and Technology (KAUST) is pleased to announce an opportunity to study marine science in the Red Sea in the summer of 2019.

The program will expose students to several aspects of Red Sea marine science, including genomics, ecology, biological oceanography, microbiology, and environmental science. The course includes fieldwork, labwork, lectures, and data workshops.

Successful applicants will receive full funding for travel, private bedroom and bath in a shared residential suite, and a stipend for a three-week period of study at KAUST.

Complete applications must be submitted by March 15, 2019.

July 21st - Aug 9th, 2019
