Beyond the Bench: Applying STEM Skills to a Career in Science Policy

Yvette R. Seger, Ph.D.

FASEB

**Chief Science Policy
& Workforce Development Officer**

Abstract: Many individuals pursuing studies in STEM are driven by a desire to apply scientific knowledge to make a meaningful impact on society. During this presentation, attendees will learn about how science policy informs evidence-based decision making by the U.S. government and within scientific research agencies such as the National Institutes of Health and National Science Foundation. The presentation will also highlight pathways to pursuing a career in science policy, including transferable skills and opportunities to hone skills in science communication and advocacy.

Wednesday, February 25th | 2:00pm-3:15pm | Science Hall 126 & Zoom
