

Selected Topics in Mathematics

(Math 01.523) - 6 S.H.

Students will be expected to select two course offerings from different areas of mathematics (e.g., Geometry; Data Analysis & Discrete Math)

This course provides students with the opportunity to explore current issues in mathematics. The course will have a changing focus that will permit faculty to offer specialized seminars focused on new developments in the field, issues of significance, areas of faculty research, or in response to students' requests. Students may take this course for credit more than once (limit: 9 sh), as long as the focus of the course is different each time the student enrolls.
